A.D. 1872, 30*th* SEPTEMBER. N° 2880.

Pen, Cigar, and Cigarette Holders.

LETTERS PATENT to Otto Schulze, of Finsbury Circus, in the City of London, Merchant, for the Invention of "IMPROVEMENTS IN PENHOLDERS, CIGAR AND CIGARETTE HOLDERS, AND IN THE MANUFACTURE THEREOF."—A communication from abroad by Otto Streubel, of Berlin.

Sealed the 25th March 1873, and dated the 30th September 1872.

PROVISIONAL SPECIFICATION left by the said Otto Schulze at the Office of the Commissioners of Patents, with his Petition, on the 30th September 1872.

I, OTTO SCHULZE, of Finsbury Circus, in the City of London, Merchant, do hereby declare the nature of the said Invention for "IMPROVEMENTS IN PENHOLDERS, CIGAR AND CIGARETTE HOLDERS, AND IN THE MANUFACTURE THEREOF," a communication to me from abroad by Otto Streubel, of Berlin, to be as follows:—

The improvements consist in the manufacture and use of cork for the purposes of serving as penholders, cigar and cigarette holders.

Schulze's Improvements in Pen, Cigar, and Cigarette Holders.

The Invention is to be performed by so manufacturing the cork into the shape desired, which may be formed of one or more pieces, that it shall be smooth and free from holes on the surface, and this may be best performed by first roughly by hand shaping the cork, and then fixing it in an ordinary lathe rest affixed to a common grindstone in such manner that the cork, when the rest is brought up to the grindstone, may revolve in one direction and the grindstone in another, and the cork ground to its desired shape. Any desired shape may be given to the cork by correspondingly grooving the surface of the grindstone. Any holes found in the surface of the cork after grinding may be stopped with a composition of cork dust and gum, or any convenient substance may be used for this purpose.

SPECIFICATION in pursuance of the conditions of the Letters Patent, filed by the said Otto Schulze in the Great Seal Patent Office on the 26th March 1873.

TO ALL TO WHOM THESE PRESENTS SHALL COME, I, Otto Schulze, of Finsbury Circus, in the City of London, Merchant, send greeting.

WHEREAS Her most Excellent Majesty Queen Victoria, by Her Letters Patent, bearing date the Thirtieth day of September, in the year of our Lord One thousand eight hundred and seventy-two, in the thirty-sixth year of Her reign, did, for Herself, Her heirs and successors, give and grant unto me, the said Otto Schulze, Her special licence that I, the said Otto Schulze, executors, administrators, and assigns, or such others as I, the said Otto Schulze, my executors, administrators, and assigns, should at any time agree with, and no others, from time to time and at all times thereafter during the term therein expressed should and lawfully might make, use, exercise, and vend, within the United Kingdom of Great Britain and Ireland, the Channel Islands, and Isle of Man, an Invention for "Improvements in Penholders, Cigar and Cigarette Holders, and in the Manufacture thereof," a communication to me from abroad by Otto Streubel, of Berlin, upon the condition (amongst others) that I, the said Otto Schulze, my executors or administrators, by an instrument in writing under my, or their, or one of their hands and seals, should particularly

describe and ascertain the nature of the said Invention, and in what manner the same was to be performed, and cause the same to be filed in the Great Seal Patent Office within six calendar months next and immediately after the date of the said Letters Patent.

NOW KNOW YE, that I, the said Otto Schulze, do hereby declare the nature of my said Invention, and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement:—

The improvements consist in the manufacture and use of cork for the purposes of serving as penholders, cigar and cigarette holders.

The Invention is to be performed by so manufacturing the cork into the shape desired, which may be formed of one or more pieces, that it shall be smooth and free from holes on the surface, and this may be best performed by first roughly by hand shaping the cork, and then fixing it in an ordinary lathe rest affixed to a common grindstone in such manner that the cork, when the rest is brought up to the grindstone, may revolve in one direction and the grindstone in another, and the cork ground to its desired shape. Any desired shape may be given to the cork by correspondingly grooveing the surface of the grindstone. Any holes found in the surface of the cork after grinding may be stopped with a composition of cork dust and gum, or any convenient substance may be used for this purpose.

In witness whereof, I, the said Otto Schulze, have hereunto set my hand and seal, this Twenty-sixth day of March, in the year of our Lord One thousand eight hundred and seventy-three.

OTTO SCHULZE. (L.S.)
